

Anantor Mobility

The Future is Endless.

Company Overview

Anantor Mobility is an Indian electric motorcycle startup focused on building future-ready, intelligent, and emotionally connected two-wheeler vehicle, blending cutting-edge AI and Battery-as-a-Service (BaaS) models to make electric mobility affordable and desirable.

Problem & Opportunity

The Indian electric two-wheeler market is rapidly expanding but struggling with high costs, lack of consumer trust, and absence of emotional engagement in existing EVs. Anantor targets this unmet need with a scalable, intelligent, and rider-centric e-motorcycle solution.

Our Solution: Anantor Astra

- Modular LFP battery system via Battery-as-a-Service (BaaS), lowering upfront cost
- AI features like face recognition, fatigue detection, voice & gesture control
- Rider experience enhancements: simulated gears, engine sound, adaptive seat temps
- Safety via helmet detection, SOS alerts, geofencing
- Smartphone dashboard integration for seamless control

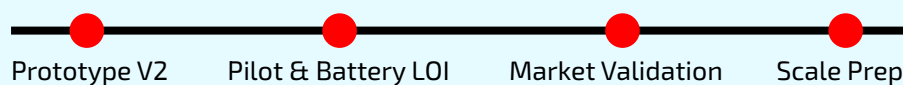

Fundraise Details

₹1.2 crore Seed SAFE

Cap: ₹12 crore Discount: 20%

Funds for: Prototype finalization, pilot execution, battery partner onboarding, go-to-market activities, and team expansion.

Milestones & Timeline (12 to 18 months)

Founding Team & Mentors

Prince, Founder and Project Lead

🎯 Leads design, development, and technical integration. Handles planning and execution mostly solo with occasional peer support.
